Special rollers

Your own design on a biscuit

Make every cookie something special with Kalmeijer's custom moulding rollers. Whether you choose a distinctive shape or your own design, each roller gives your product range a recognisable and unique appearance.

Every Kalmeijer roller is designed, engraved and finished by our own craftsmen in our workshop in The Hague. With decades of experience in moulding roller production, we create deep, sharp engravings that ensure a crisp and consistent design, from the first cookie to the last batch of the day.

Made from food-safe synthetic material with stainless steel shafts, our rollers are built to withstand heat, butter and daily cleaning while retaining their fine detail through years of production. That is why every Kalmeijer moulding roller is guaranteed for life. If a roller lets you down during normal use, we will repair or replace it.
